PROFESSIONAL EXPERIENCE

Software Engineer - Retain Health, Inc.

Aug 2021 - Present · Boston, MA (Remote) · Part-time contract

Healthcare platform with 25,000+ users focused on Alzheimer's prevention through personalized lifestyle interventions.

- Core contributor to RetainYourBrain (retainyourbrain.com), building and maintaining production features since August 2021.
- Built core features full-stack on AngularJS, Express.js, Next.js, Node.js, TypeScript, and MySQL.
- Designed a dynamic form system with complex conditional logic powering personalized routines and topic recommendations.
- Created reusable AngularJS services with dependency injection to reduce redundant API calls and improve frontend performance.
- Introduced automated testing with Jest, Cypress, Mocha, Supertest, Karma, and Protractor, plus GA4/GTM analytics.

Tech: AngularJS, Express.js, React Native, TypeScript, MySQL, AWS, Google Analytics

Full-Stack & AI Engineer - Wequity

Oct 2025 - May 2026 · Brussels, Belgium (Remote) · Part-time contract

Legal tech company building AI-powered tools for law firms and notaries across Belgium and the Netherlands.

- Built full-stack features for NORA, an AI-powered legal document processing platform handling English, French, and Dutch documents on React, FastAPI, and Supabase.
- Built a Smart Processing module that learns document transformation patterns from example pairs using LLM APIs and DSPy.
- Developed a RAG-based Knowledge Base where users query uploaded legal documents and get AI-generated answers with source citations.
- Integrated the DeepL API for legal document translation across English, French, and Dutch.
- Designed background task architecture using Google Cloud Tasks and Pub/Sub for async document processing.

Tech: React, FastAPI, Supabase, GCP, Vertex AI, LLM Integration, OpenAI API, DSPy, BigQuery, DeepL

Freelance Web Developer - Upwork (Top Rated)

Aug 2024 - Present · Worldwide (Remote) · Self-employed

Build web applications, custom Shopify themes, e-commerce stores, and landing pages for individuals and businesses.

- Completed seven Upwork contracts, each rated 5 stars, with a 100% Job Success Score.
- Built the Martinez Auto Detail booking system with dynamic pricing and Square-powered card storage.
- Developed Socialura (socialura.alabaganne.com), a WordPress site with Stripe checkout for digital service sales.

Tech: Next.js, React, Node.js, Tailwind, Supabase, Stripe, Square, Shopify, WordPress

Full-Stack Developer Intern - Satoripop

Jul 2023 - Aug 2023 · Sousse, Tunisia (Hybrid)

Built a Google Meet-style video meeting platform independently during the internship.

- Built a video meeting platform with authentication, meeting creation, scheduling, protected pages, and Jitsi-powered calls.
- Delivered both frontend and backend independently with React, TypeScript, Express.js, and MySQL.

Tech: React, TypeScript, Node.js, Express.js, MySQL, Jitsi SDK

Full-Stack Developer Intern - Realinfo

Feb 2021 - May 2021 · Hong Kong SAR (Remote)

Built an admin dashboard for a real estate intelligence platform, working directly with the CTO via weekly milestones.

- Built an admin dashboard with Vue.js and Node.js to manage and visualize property data.
- Delivered enhanced data visualization and reporting through weekly milestone reviews with the CTO.

Tech: Vue.js, Quasar, Node.js, Feathers.js, MongoDB, SCSS

Web Development Intern - Satoripop

Jul 2020 - Aug 2020 · Sousse, Tunisia (Hybrid)

Developed a web application to manage company employees and converted a PSD landing page into a fully responsive site.

- Built Satoripop RH, a Vue.js and Laravel HR platform with role-based dashboards for managers, HR, project managers, and employees.
- Documented backend API endpoints using Swagger/OpenAPI for clean handoff.
- Converted a PSD landing-page design into a responsive e-commerce front-end with hand-written HTML, CSS, and JavaScript.

Tech: Vue.js, Laravel, MySQL, Bootstrap, HTML, CSS, JavaScript

SELECTED PROJECTS

MenuMate (menumate.net) - SaaS I founded for restaurants: QR-code digital menus, real-time ordering, and an admin dashboard. SEO-optimized and multilingual. Next.js, React, Supabase, Tailwind.

Martinez Auto Detail (booking.martinezautodetailwa.com) - Custom booking system with service selection, dynamic pricing, date/time picking, Square-powered card storage, and an owner dashboard. Next.js, React, Tailwind, Square API.

LeBonBureau (lebonbureau.alabaganne.com) - Polished e-commerce storefront for an office-furniture brand with a refined responsive design, product catalog, and admin dashboard. Next.js, React, TypeScript, Supabase.

Internly (internly.alabaganne.com) - Internship platform (end-of-studies project) where students apply to internships and companies post opportunities, with real-time notifications, tracking, and dashboards. Laravel, Vue.js, Inertia.js, MySQL, Pusher.

Global Deals (global-deals.vercel.app) - Interactive 3D globe with event markers, clustering, and Bezier line visualizations; admin panel and authentication. React 18, Mapbox GL JS, Supabase, Tiptap.

ATS Resume Builder (ats-react-resume-builder.vercel.app) - Resume builder with structured templates, real-time preview, and one-click PDF export. Next.js, React, Tailwind, jsPDF.
