Ala Baganne

Full Stack Engineer | React · Next.js · AngularJS | 5 yrs @ Retain
Health | Top Rated Freelancer
Gouvernorat Monastir, Tunisie

Résumé

I'm a Full Stack Software Engineer with 5+ years of professional experience building web applications across healthcare, legal tech, and freelance projects. At Retain Health, I've been a core contributor to RetainYourBrain — a digital health platform with 25,000+ users that helps reduce Alzheimer's risk through science-backed daily habits. Working across AngularJS, Express.js, MySQL, and React Native in a remote Agile environment, I've helped the platform achieve a 22% user retention rate. It's the kind of long-term, production-grade work that taught me how to write code that actually holds up over time. In parallel, I work as a freelance developer, Top Rated on Upwork with a 100% Job Success Score, delivering full-stack solutions for clients worldwide using React, Next.js, Node.js, and Tailwind CSS. More recently, I contributed to Wequity, an AI-powered legal document automation platform built with FastAPI, Supabase, GCP, and Vertex AI. Outside of client work, I build my own products. MenuMate (menumate.net) is a SaaS platform I designed, built, and launched — it lets restaurants create digital menus, generate QR codes, and accept real-time orders from a single dashboard. I care about clean architecture, good UX, and shipping things that work in the real world. Always open to interesting problems.

Expérience

Retain Health
Software Engineer
août 2021 - Present (5 ans 1 mois)
États-Unis

Core contributor to RetainYourBrain, a digital health platform with 25,000+ users aimed at reducing Alzheimer's risk achieving a 22% user retention rate.

Developed and maintained key healthcare application features using AngularJS, Express.js, Bootstrap, MySQL, and React Native. Collaborated

closely with QA, design, and product teams in a remote Agile environment. Built and maintained a robust automated testing suite (Karma, Protractor) that reduced regression bugs and helped ensure reliable production releases over 4+ years.

Upwork

Freelance Web Developer

octobre 2024 - Present (1 an 11 mois)

Top Rated Freelance Web Developer on Upwork with a 100% Job Success Score, specializing in building modern, scalable, and high-performance web applications.

Worked with clients worldwide on SaaS platforms, business websites, booking systems, dashboards, e-commerce platforms, and custom web solutions using technologies such as Next.js, React.js, Node.js, Express.js, Tailwind CSS, MySQL, and Supabase.

Focused on delivering clean UI/UX, responsive design, SEO optimization, performance improvements, and scalable backend architectures while maintaining strong communication and long-term client relationships.

Wequity

Full Stack & AI Engineer

octobre 2025 - mai 2026 (8 mois)

Région de Bruxelles-Capitale, Belgique

Worked on AI-powered legal document automation systems using Supabase, FastAPI, Google Vision API, Vertex AI, GCP, and Vercel. Built frontend and backend features including real-time updates, OCR, anonymization, file storage, AI integrations, and cloud deployments. Collaborated with product and engineering teams in Agile sprints.

satoripop

Full Stack Web Developer Intern

juillet 2023 - août 2023 (2 mois)

Sousse, Tunisia

Built a video meeting platform similar to Google Meet using React.js, Express.js, MySQL, and Jitsi Meet. Developed the platform independently, including authentication pages, meeting features, and responsive user interfaces during the internship.

Realinfo

Software Engineer Intern

février 2021 - mai 2021 (4 mois)

Hong Kong SAR

Built an admin dashboard using Vue.js (Quasar) and Node.js (Feathers.js) to improve data management and visualization. Regularly met with the CTO to share progress updates and align on project milestones.

satoripop

Web Development Intern

juillet 2020 - août 2020 (2 mois)

Gouvernorat Sousse, Tunisie

Designed and developed a web application to manage company employees using Vue.js and Laravel. Documented all backend API endpoints using PHP Swagger and converted a PSD landing page design into a fully responsive web page.
